Move your data to the cloud with Azure and The Bauen Group

CUSTOMER JOURNEY

What's happening in the industry?
- 80% of SMBs deploy the cloud.
- 60% of Global 2000 companies will double their productivity via the cloud.

How can the cloud help me?

Data Backup
- Simplify tape management with significant cost savings, short recovery times, and up to 99 years of retention.
- Store in geo-replicated storage, maintaining 6 copies of data across 2 Azure datacenters.
- 99.9% service availability.

Disaster Recovery
- Restore services during a site outage at the primary datacenter.
- Protect Hyper-V, VMWare, and physical servers with System Center and SQL Server AlwaysOn.

Security
- Leverage advanced analytics and threat intelligence to detect attacks.
- Simplify investigation for rapid threat response.
- Use access and application controls to block malicious activity.

Why Azure?
- 100 or more services are provided by Azure Cloud, including Virtual Machines, Storage, Databases, Backup, Azure Active Directory, Analytics, and more.
- 90% of Fortune 500 companies trust the Microsoft Azure Cloud.
- Forrester Consulting concluded that datacenter costs are reduced by $12M when switched to Azure.
- 90% or more of cloud providers trust the Microsoft Azure Cloud.
