

Move your data to the cloud with **Azure** and **The Bauen Group**

CUSTOMER JOURNEY

What's happening in the industry?

How can the cloud help me?

Data capacity By 2020 the amount of high-value data will double.	Compliance Industry standards must be met for data compliance .	Secure data Customers need constant secure technology ; 76% of enterprises are restricting access to sensitive data to limited individuals.
Costs Public cloud is growing at 6x the rate of IT spending through 2020. Moving to the cloud reduces costs .	Data and infrastructure availability Customers need to ensure availability and infrastructure reliability .	

Where do I start?

- Take these steps:
- 1 Back up your data to the cloud
 - 2 Mitigate the impact of disasters
 - 3 Secure your data in the cloud

Data Backup With Azure backup solutions, you can protect your data and applications to avoid costly business interruptions and meet compliance requirements. Securely extend your on-premises backup storage and data archiving solutions to the cloud—reduce cost and complexity, and achieve efficiency and scalability .	Disaster Recovery Even a minor outage can put you at a competitive disadvantage. Be ready with a business continuity plan that includes disaster recovery for all your major IT systems—without the expense of secondary infrastructure.	Security With an increase in security breaches and cybercrimes, companies are rightfully concerned about the security of their data in the cloud. Stay protected with Azure security .
